

Welcome to Cheaha Area Regional Emergency Specialist

C.A.R.E.S.

- Affectionately known as CA.R.E.S., the clinic has been apart of the Anniston community since we opened our doors in 2001.
- From the very beginning Cares has offered such services as Immediate Care, Family Care and Occupational Medicine.
- We would like to take you through a virtual visit.

When you arrive at our office you are greeted by one of our cheerful staff members.

Signing in to be seen

- Cares provides two separate sign in sheets, one for Immediate and Family care patients, and another for our Occupational or Workman's Compensation patients.
- All of our work related patients are designated by a **GREEN** sign in sheet and chart.
- This designation helps to facilitate a fast track through out the employees entire visit.

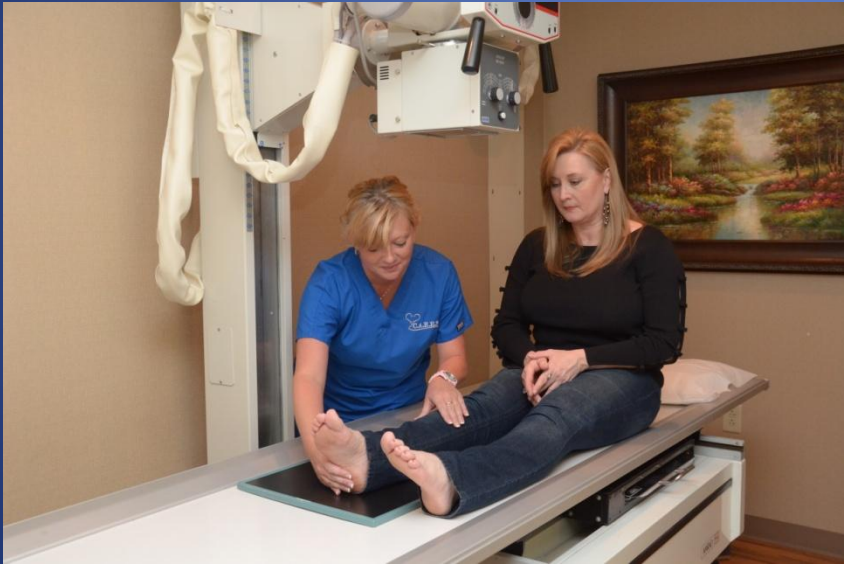

Triage

Triage

- Each patient is triaged by one of our qualified staff using state of the art equipment and the information is entered into our computers Electronic Health Record.
- Personnel specifically trained to assess occupational injuries and illnesses will take the patients history, vital signs, and complete a drug screen and breath alcohol test when required.

They will also order any additional test like x-ray, lab, pulmonary function or EKG if needed.

Once in the exam room, the patient will be evaluated by one of our Board Certified Physicians.

The physicians will then review any test results with the patient, listen to their concerns and answer questions.

Cares is capable of providing a variety of treatments from minor surgical procedures to bandaging and splinting.

We hope you will consider C.A.R.E.S. for your healthcare needs.
